Every insured has a duty to give a fair presentation of the risk to an insurer based on their reasonable understanding of the risks to their business. This is one which clearly discloses all material facts which their senior management and the persons responsible for arranging their insurance know, or ought to know, following a reasonable search of information available to them. It should include all facts that would influence the judgement of the insurer or that would put the insurer on notice that it needs to make further enquiries.

A material circumstance is defined as:

- Special or unusual circumstances relating to the risk;
- Any particular concerns which led them to seek insurance cover for the risk; and
- Anything which those concerned with the class of insurance and field of activity in question would generally understand as being something that would be dealt with in a fair presentation of risks for this type of insurance.

Please ensure that your client is aware that if they fail to disclose information, misrepresent any fact which may influence the insurer's decision to accept the risk or the terms offered, or fail to make a fair presentation to an insurer, this could invalidate the policy and mean that claims may not be paid in full.
